

Education Committee Report

Annual General Meeting

April 29, 2014

The Education Committee is committed to improving knowledge on the environment and educating people on waste management.

CMEI continues to support environmental education with the bussing of grade 4 students from all Host Community schools to the landfill for educational sessions. Grants for environmental projects at each of the 5 host schools and our support are also offered to enhance education and beautify our community.

Scholarships of \$1000.00 each were awarded to two students at NBCC-Saint John; Keir Bastarache (Process Control Technology) and Jonathan Losier (Process Control Technology) and two students at UNBSJ; Brandon Laskey (Bachelor of Arts) and Jillian Wong (Bachelor of Arts and Education).

CMEI will continue to encourage students to apply for our scholarships through advertisements and word of mouth. It is with great pleasure that our committee offers Grants to students of the Host Community.

Kathy Lawrence

Education Committee, CMEI
