

Education Committee Report

Annual General Meeting

April 26, 2011

The Education Committee is committed to improving knowledge on our environment and educating generations on waste management. I have attended meetings with the Fundy Solid Waste Commission (FRSWC) and had the opportunity to attend the NBCC-Saint John scholarship awards ceremony.

This Committee continues to financially support the bussing students from our host community schools to the Crane Mountain landfill site.

This year, the Education Grants were awarded to two students from NBCC-Saint John: Kimberly Smart and Erica Boulter. The two students from UNB were: Ethan Arsenault and Graeme Powell.

In working with the host schools this year, the application form was changed. The objective was to clarify any confusion on the subject of school grants and special projects.

The CMEI Board has just approved and received five Green Teacher Resource books that will be distributed to the host schools.

Respectfully submitted,

Kathy Lawrence
Education Committee, CMEI
